

Purpose-Built UPtime Kits

Ordering and stocking parts for your SENNEBOGEN equipment becomes quick and easy with these convenient kits matched to specific service tasks and machines.

SENNEBOGEN®

Parts stocking made easy *Save time, save money*

**...streamline every service,
maintenance and repair task**

In the shop or in the field, these fully stocked packages bring together all the parts and materials required for a specific service need, conveniently sorted and organized in one place.

Simplify parts inventories and service calls

With a single part number to order and stock, SENNEBOGEN prepackaged kits are the smart way to manage hundreds of related service parts.

- In-stock and ready to ship
- Matched to your machine model and series
- Job-specific components
- Save time sorting loose parts
- Ideal for stocking service trucks

Order your UPtime Kits by Model & Part Number

Auto Lubrication Kits

Each accessory kit for the Central Lubrication System includes more than 80 components. As well as all the common parts needed for system repairs, this kit is designed to get you back on the job quickly and also has all the basic tools necessary to work on your SENNEBOGEN systems. These Central Lubrication System kits are available in three different configurations, based on model.
