

Rubber Tired (M) - 84,900 lb (38,500 kg) **Crawler (R-HD) -** 96,780 lbs (43,900 kg)

Purpose-Built – **To Suit Your Purpose**

By building simply, we can build flexibly.

The design and manufacture of every SENNEBOGEN material handler begins with you, our customer, and the challenges you face every day. Our singular focus leads us to the simplest, most efficient engineering solutions.

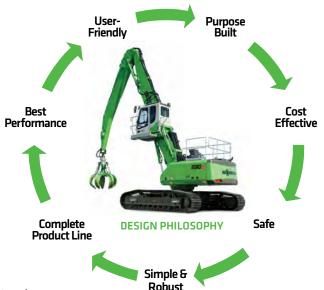

To meet our commitment to customer needs, the simplest solution is to engineer machines that adapt easily to their intended purpose:

- Interchangeable components across multiple platforms Intelligent hydraulics in place of complex electronics
- Industry-standard service parts

- Robust structures matched to heavy loads and stresses

Now in our third generation as a family-owned business, SENNEBOGEN takes pride in taking a personal interest in the needs of our customers. By listening and responding to their requirements, we have continuously delivered the world's best material handling solutions since 1952.

When you purchase a SENNEBOGEN machine, you'll know it was purpose-built for you, from the ground up.

QUICK SPECS	830 M RUBBER TIRED	830 R-HD CRAWLER TRACKS
Net Power	225 HP (168 kW)	225 HP (168 kW)

Magnet System	20 kW	20 kW
Max reach	55'9" (17 m)	55'9" (17 m)

SEXTEBOLER

One Model: Many Choices

The SENNEBOGEN 830 is offered with a complete range of mobile and stationary undercarriages to provide the best fit for your operation and related equipment. The adaptability of the 830 diesel power and/or electric drive with multiple boom configurations allows customers to choose the right model to achieve their production goals without the added cost of custom engineering.

Power

With their purpose-built lifting capability and engineered *eGreen* efficiency, SENNEBOGEN material handling machines reduce both your operating costs and your environmental footprint whether you choose diesel power, electric drive or a combination of the two.

Cab Configurations

The elevating Maxcab, now with bulletproof windshield and skylight as standard equipment, allows an unobstructed view in all directions for increased safety and productivity, even under harsh and adverse conditions. Optional features include:

- Windshield protective guard
- Skylight protection guard and/or FOPS guard
- Floor window

Platforms

The modular machine concept of the 830 provides one base model design that's available on any required mounting for gantries, rail cars, barges and ship applications.

Booms and Sticks

A wide choice of powerful boom and stick configurations allows the 830 to adapt easily to the specific lift and reach requirements of your operations.

Attachments

SENNEBOGEN grapples and magnets complete your purpose-built solution with the same reliability as our 830 material handling machines. Your machine will also accept a full range of standard attachments from all brand-name manufacturers including:

A CALLAND

UNDERCARRIAGE

Stable footprint

The centered point of rotation for the swing bearing allows for 360° equal lift capacity

Swing system

The large-diameter slewing ring provides excellent cycle times and swing torque for large loads

CAB

Elevating Maxcabs

Various cab configurations maximize safety, loading accuracy and stability. Optionally available with an elevated fixed cab

Joystick steering

Unobstructed view for operator with highly responsive control

SENCON

Advanced diagnostic system with userfriendly multi-colored interface, available in multiple languages

HYDRAULIC SYSTEM

Purpose-built design

Fully hydraulic controls require no special software to troubleshoot and all test ports are easily accessible in one place

Convenient servicing

All test ports are easily accessible in one place

Multiple platforms

Entry/exit

Maxcab sliding door with permanent

catwalk for safe, easy entry and exit

Superior visibility

Large bulletproof glass front window

supplemented by 2-camera system

and skylight as well as large side windows

are standard. Also available with glass floor

The modular 830 is designed to adapt to standard wheeled, tracked and pedestal mounts

One-piece center frame

Upper carriage

Optimizes distribution of stresses and machine balance from boom pivot to counterweight

Reversible fan

Closed circuit drive with axial displacement pump allows fast change between normal and reverse

BOOM & STICK

Limit switches

Limit switches on the boom and stick cylinders prevent high pressure peaks to provide a cushion for rod movement and prevent attachments from colliding with the cab

Purpose-designed boom mounting point on the chassis for enhanced balance and lifting capacity

SAFETY

Full guarding on upper decks provide safety for technicians on North Americans models

Fuses and relays

All fuses and relays are clearly labeled and easily accessible in a centrally located terminal box

HydroClean filtration

3-micron oil filtering with 99.95% efficiency absorbs water, prevents acid generation

Safety rails

UPPER CHASSIS

Guarding surrounds upper deck to enhance

OSHA-compliant

Continuous 3-point contact access to upper deck with handrails and guarding from ground to cab

Longitudinal engine mount

Allows safe and easy access and unequaled fuel efficiency due to efficient cooling

Automatic lubrication Extend component life with no waste,

no spill hazards

Cylinder protection

The boom and stick have been designed specifically for material handling applications. Hydraulic cylinders are mounted and protected by an open box frame to ensure uptime

The door slides open for safe ease of entry and exit from the cab

Bulletproof glass

Bulletproof windshield and skylight are standard on all new SENNEBOGEN models

Soft-Soils Mobility 830 M-HDS

Highly recommended for log yards and jobsites that face seasonal mud and soft soil challenges, SENNEBOGEN'S M-HDS model replaces the 830's standard dual tires with oversized single tires providing a larger footprint and increased traction.

==

QUICK SPECS	830 M -HDS RUBBER TIRED
Net Power	225 HP (168 kW)
Operating Weight	90,390 lbs (41,000 kg)
Magnet System	20 kW
Max reach	55'9" (17 m)

The increased ground clearance by four 16.00-25 tires all the 830 M-HDS to move easily on uneven terrain and over obstacles.

830

1111 - 3

The 830 M-HDS is designed for rough terrain with a reinforced heavy-duty undercarriage and large-dimensioned single tires for extra flotation. Optional 30° tilting cab reduces operator fatigue while processing elevated work zones.

Telescopic wide-track crawler undercarriage enhances stability on soft soils and unstable footings.

830 R-HDD

SENNEBOGEN's purpose-built demolition model is versatile solution built to withstand severe working conditions and attachment requirements for operating shears, hammers, grabs, hooks, magnets and milling tools.

QUICK SPECS	830 R-HDD CRAWLER
Net Power	225 HP (168 kW)
Operating Weight	96,780 lbs (43,900 kg)
Magnet System	20 kW
Max reach	55'9" (17 m)

A specially reinforced boom with extra-large bearings stands up to extreme demolition stresses to deliver dependable, long-lasting production.

Bulletproof glass and heavy-duty front guarding maximize operator protection from impacts and falling debris. PURPOSE-BUILT MATERIAL HANDLER

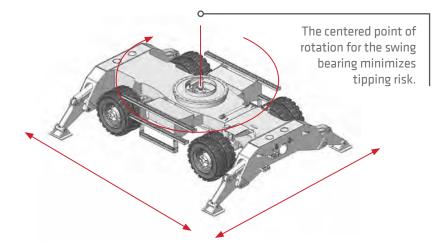

Various optional guarding packages available to meet industry safety requirements.

Health & Safety: The First Step To Productivity

SENNEBOGEN is renowned as the industry leader in preventing downtime, and in protecting people.

Safety-conscious producers look for equipment that prevents liability costs and protects their most valued assets. SENNEBOGEN works closely with the operators and technicians who know our equipment best, and we listen to their ideas to make our machines the safest on any jobsite.

That's why ease of access, ground-to-cab guarding, sliding door cab entry, 360° visibility, battery disconnect switch and travel alarm are all standard features of your 830.

Dual cameras with views to the rear and to the right side are standard equipment.

Bulletproof windshield and skylight are now standard on all new SENNEBOGEN material handers.

Safe access to the upper deck is achieved with a permanent 3-point contact ladder with railings.

Handrails around the upper deck and anti-slip walking surfaces provide a safe working environment for service and maintenance crews.

All high pressure hydraulic hoses in the engine compartment are secured in sleeves to protect service personnel.

Maxcab's sliding door and guarded permanent catwalk provides the safest entry and exit in the industry.

> SENNEBOGEN's Maxcab puts you in the driver's seat for jobsite safety.

Maxcab's maximized window area and elevating mount gives the operator an unobstructed wide-angle view of the work zone.

All daily service is completed at ground level with easy access to all maintenance points.

Accessible safety switches including emergency shut-off, battery disconnect and travel alarm.

Intuitive joystick controls connect the operator seamlessly to the industry's most responsive hydraulic system for precise, easy handling.

Ergonomic comfort and climate control features keep operators alert, adapting to individual preferences to fight fatigue through long shifts.

Good For The Environment. Easy On The Budget.

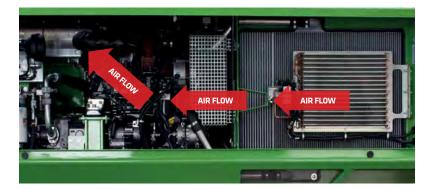

SENNEBOGEN 830 E Series material handlers lead a new generation of machines that are both cost-saving and environmentally-friendly.

Creating a truly "green" machine takes more than a new energy-saving device. Our "Green Efficiency" solution is built on layers of smart engineering and system innovations aimed at doing more with less. The 830 E material handlers reduce your costs and environmental footprint with multiple SENNEBOGEN initiatives.

Optional electrically powered eGreen models achieve an additional 50% reduction of energy costs over diesel models, along with low noise and vibration-free operation.

Longitudinally mounted engines provide a natural, flow-through air tunnel for efficient cooling and additional fuel economy, while adding structural strength to the upper carriage from boom pin point to counterweight.

Operating Automatic Stop ECO Mode Idle 1800 ECO 1400 800 Π min⁻¹ min⁻¹ min⁻¹ min⁻¹ 0 s 5 s 8 s 5 min

The large reversing fan provides up to 45% more of the cooling surface than comparable machines.

Along with saving fuel costs, electric-drive models reduce operating costs. With no engine servicing required and no downtime to refuel, machine availability is increased and environmental exhaust is completely eliminated.

3 WAYS TO SAVE ON DIESEL

- With the new ECO mode switch turned on, the 830 operates normally but engine speed is reduced from 1,800 rpm down to 1,400 rpm.
- The 830 E Series includes an automatic idling mode that reduces engine speed to 40% of working speed. In operations where a wait time of 8 seconds or more is involved, such as loading trucks or feeding shears and shredders, the RPMs will drop to a fuel efficient 800!
- The automatic stop function switches the engine off completely if no power is required in a specified time.

Attention To Details Makes Us Stronger

Strong and smart SENNEBOGEN machines stand up to your toughest and grittiest work environments.

Reliability and durability are engineered into the details of your 830, from heavy-duty structural components to natural flow-through engine cooling. Each of SENNEBOGEN's manufacturing, fabrication and assembly facilities is ISO-certified to deliver the same outstanding quality in every machine, every time.

By going to work every day, and staying on the job year after year, your 830 is built to deliver the best return on your equipment investment. The swing bearing is equipped with automatic lubrication to withstand extreme 360° duty cycle operation.

A continuous flange ring reduces stress and improves distribution of swing loads to the under carriage.

Fully hydraulic controls require no special software to troubleshoot and all test ports are easily accessible in one place.

The upper carriage is built around a large, continuous one-piece center frame for added structural strength and improved air flow.

Fabricating booms and sticks in our own shops lets SENNEBOGEN eliminate welding stresses inside the box structure and maximize service life.

Low-vibration engine mounting reduces wear con components and lowers sound levels.

S

The reversible cooling fan quickly cycles to reversing mode to clear out dust and debris, even in the most challenging work environments.

830

.

Proven Uptime To find out how to make SENNEBOGEN

With no bypass in the fluid circuit, SENNEBOGEN's HydroClean system continuously protects hydraulic components with industry-leading 3-micron oil filtration.

Solid steel top-opening compartment access doors on the sides top of the upper deck and above the engine compartment maintain a secure fit, even after repeated opening for service access.

Automatic central lubrication, standard on all SENNEBOGEN machines, saves servicing time every day while improving component lifecycles.

... we talk to the technicians who actually service our equipment.

material handler, we ask the experts...

machines easier to maintain than any other

Our own support team, our instructors, our dealers and customers are all in constant contact to troubleshoot problems and find permanent solutions. Even our senior management and the Sennebogen family take a hands-on approach to product improvement, meeting customer mechanics and operators in their own shops and yards.

Their innovative ideas help us to deliver machines that spend more time on the job, and less time in the shop.

SENNEBOGEN Uptime Kits, matched to specific service tasks and machines. Hundred of assorted parts, connectors, fittings, electrical components are easy to locate and access.

In the shop or in the field, these fully stocked kits bring together all the parts and material required for

and material required for a specific service need, conveniently sorted and organized in one place.

SENCON

The advanced SENCON diagnostic and reporting system presents a multicolored user-friendly interface, now available in multiple languages.

All the fuses and relays are in a centrally located box for easy access.

Test and service points are conveniently arranged together behind the cab and within reach from ground level.

Simple hydraulic controls replace complex electronics, so the 830 requires no special software or "black box" components to troubleshoot your machine.

Our Commitment To Your Business

SENNEBOGEN's investment in service support is unmatched in the industry, providing the capabilities and resources to build success for our customers.

- Our headquarters in Stanley, NC is a 100,000 sq. ft. (9,300 m²) multi-purpose facility dedicated to supporting SENNEBOGEN material handlers throughout the Americas.
- Our coast-to-coast network of factory-trained distributors and technicians sets the industry standard for outstanding field service.
- SENNEBOGEN application specialists provide customers and dealer sales staff with expert insight into the unique challenges.
- Our in-house engineering services respond quickly to customer needs for unique solutions.

Our large parts warehouse maintains inventories of service parts and replacement components for all of our fielded machines, from O-rings to engines, axles and complete boom and stick assemblies.

Training Center of Excellence

EEGGEN

The dedicated Training Center in our North American head office complex provides primary and advanced courses. Offered free of charge for our dealers and their customers, the Training Center has working units, demonstration modules and is staffed with professional trainers each with many years of in-field experience and hands-on knowledge.

Visit us online at www.sennebogen-na.com/training

Purpose-built for America's Best-Trained Technicians

The main demonstration bay allows hands-on access to machines while the meeting rooms and classrooms are all equipped with the technology required for today's interactive instruction methods.

Truly a Center for developing excellence in service and support for dealer and customer personnel, the SENNEBOGEN Training Center has earned accolades for the quality of the instructors, facilities and materials.

Service Level 1

Min 6 / Max 10 Students per class

Required: Basic Technical Knowledge

5 Day Course

Course Content:

- Machine Safety, Operation & Functions
- Preventive Maintenance
- Read & Understand Hydraulic Schematics
- Read & Understand Electric Schematics
- Basic Trouble Shooting: Magnet System, Hydraulics, Electrics

Offered in English and Spanish sessions

Course fees: No charge to SENNEBOGEN dealers, staff and customers.

ALL TRAINING COURSES AVAILABLE FREE

Service Level 1 D-Series Service Level 1 E-Series Service Level 2 E-Series Parts Training Operator Familiarization

Service Level 2

Min 4 / Max 6 Students per class

5 Day Course

Required: Completion of Level 1 Class

Course Content:

- Remote Trouble Shooting
- Component Training & Repair
- Failure Analysis
- In-Depth Trouble Shooting Magnet System, Hydraulics, Electrics
- Offered in English and Spanish sessions

Course fees: No charge to SENNEBOGEN dealers, staff and customers.

Level 2 classes are smaller & more intensive & build on Level 1.

Purpose-Built Facilities

With nearly 1,000,000 sq. ft. (93,000 m²) of production space in our four manufacturing facilities, every step of production at SENNEBOGEN is planned to serve individual customer needs. Every critical component and process is completed in-house to assure quality, efficiency and flexibility on the production line.

- We fabricate our own booms and sticks
- Our line-up is based on a full line of interchangeable platforms
- Our plants are designed to customize each machine, built-to-order
- Your machine is fully inspected and live-tested before it leaves the factory

Our four factories in Europe support the full range of capabilities for SENNEBOGEN to machine, fabricate and assemble all major components to our own standards, in-house.

> (Pictured here is our main plant in Straubing, Germany)

Modular components used across multiple products allow SENNEBOGEN to deliver purpose-built machines competitively. Shared systems also streamline aftersale parts inventories for customers and their local SENNEBOGEN distributors.

Every configuration of a SENNEBOGEN begins as an identical machine up until the final stage of assembly. The unit is then mounted on your choice of undercarriage or platform, and completed with your preferred equipment and choice of cab.

The Right Tools For Every Job Ensures Maximum Uptime

Orange Peel **Grapples**

Built to grab and hold large loads efficiently, with easy handling and reliable service

- Rotator design with 360° rotation
- 4-tine and 5-tine scrap grapples from .5 to 5.0 cu. yd.

Keep your 830 E "purpose-built" from end to end with your choice of genuine SENNEBOGEN attachments.

SENNEBOGEN grapples and lifting magnets are all heavy-duty production-rated tools, built to SENNEBOGEN's exacting standards for reliable, efficient service. Specified to match the fittings and power ratings for your SENNEBOGEN material handler, these attachments ensure that you always get the most productivity from your machine.

Available only from your authorized SENNEBOGEN dealer, green machine attachments qualify as part of your total SENNEBOGEN Capital financing package.

Lifting Magnets

Made-in-America magnets engineered to operate 24/7 with consistent lifting strength throughout every working shift

- Deep field and extra deep field models with aluminum or copper coils
- All common sizes from 30" to 72" (762 mm to 1,828 mm)

Waste Grapples

Extra wide jaw and elongated head structure to grab large loads in transfer stations and wood waste handling

- Heavy-duty 5,000 PSI hydraulic cylinders
- Load capacity
 0.4 and 0.6 yard

Mag **Grapples**

Combination 4-tine grapple and magnet to sort and separate scrap metals from mixed loads and debris

- 360° rotation; designed for both high radial and axial loads
- Grapples from .75 to 1.5 cu. yd. with magnets from 30" to 44" (762 mm to 1,118 mm) diameter

Lift capacities are stated in pounds. Values in [] are stated in metric tons. Indicated figures are based on ISO 10567 and do not exceed 75% or tipping and 87% of hydraulic capacity and machine standing on firm, level supporting surface. Loads are valid for 360° with machine support outriggers Lifting capacities do not include working equipment such as orange peel grapples, magnets, clamshells, etc. The load point is the center line of the attachment pivot mounting pin on the stick. Their weights must be deducted from the numbers indicated in the lift charts. Please contact SENNEBOGEN or your local dealer for optimum attachment selection. The operator / user of the machine should be fully acquainted with the operator's & safety manual provided be SENNEBOGEN. Capacities apply only to the machine as originally manufactured and equipped by SENNEBOGEN.

Lift Capacities - 830 M-HDS "E"

eye level approx. 18' (5.5 m)

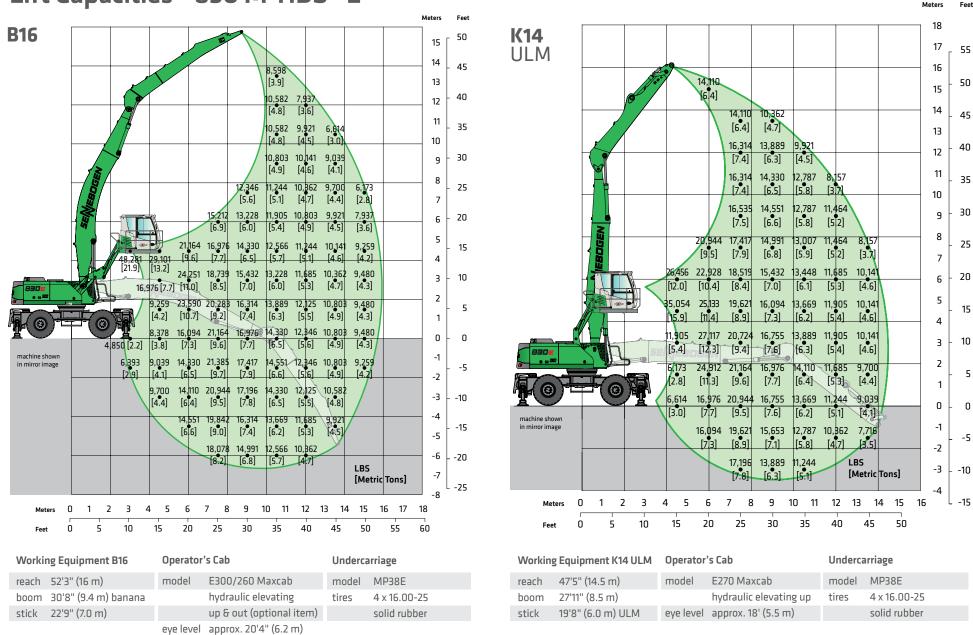

Lift capacities are stated in pounds. Values in [] are stated in metric tons. Indicated figures are based on ISO 10567 and do not exceed 75% or tipping and 87% of hydraulic capacity and machine standing on firm, level supporting surface. Loads are valid for 360° with machine support outriggers. Lifting capacities do not include working equipment such as orange peel grapples, magnets, clamshells, etc. The load point is the centrel line of the attachment pivot mounting pin on the stick. Their weights must be deducted from the numbers indicated hunders. Please NEBOGEN or your local dealer for optimum attachment selection. The operator / user of the machine should be fully acquainted with the operator's 5 stafty manual provided be SENNEBOGEN.

REFILL CAPACITIES	
fuel tank	132 gal (500 L)
engine cooling system	13.20 gal (50 L)
engine oil w / filter	4.49 gal (17 L)
hydraulic tank	82 gal (310 L)
hydraulic system	180 gal (680 L)
swing gear (each)	1.06 gal (4.0 L)
final drive (each)	2.38 gal (9.0 L)
swing ring	0.26 gal (1.0 L)
lubrication reservoir	
central lubrication	5.5 lb (2.5 kg)
reservoir	
diesel exhaust fluid	7.93 gal (30 L)
MAGNET SYSTEM (C	PTIONAL)
rating	20 kW
voltage (magnetized)	230 V
current (cold condition)	87 Amps
controller	Hubbell
generator	Baldor
drive	hydraulic
WEIGHT	
operating weight	96,780 lb (43,900 kg)

Dimensions - 830 R-HDD "E"

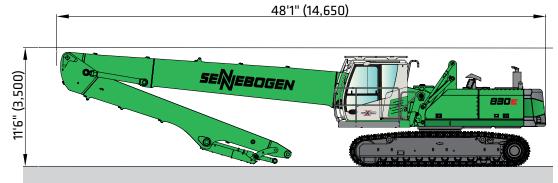

Shoe width width	Minimum transportation width
2' (600 mm)	9'11" (3,000 mm)
2'4" (700 mm)	9'11" (3,000 mm)
2'7" (800 mm)	10'2" (3,100 mm)

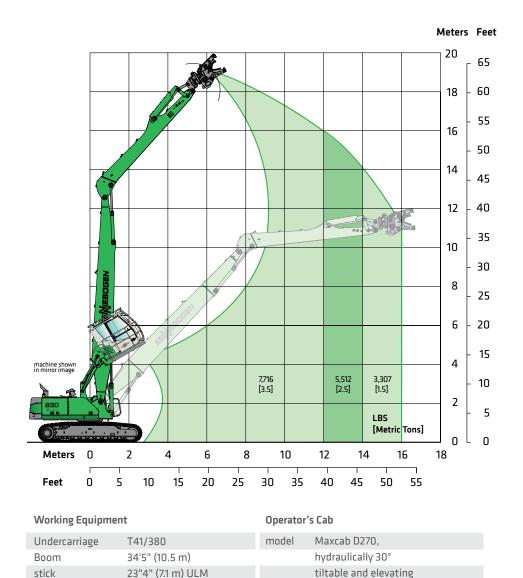

830 R-HDD with T41/380 undercarriage and hydraulic elevating Maxcab D270, 30° tiltable option

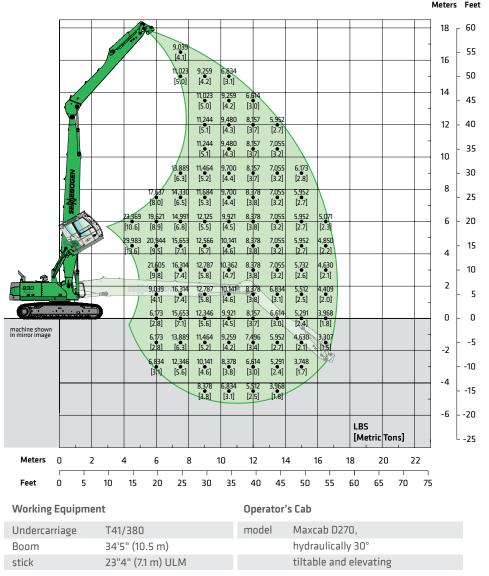

Transport Dimensions -830 R-HDD "E"

830 R-HDD with T41/380 undercarriage and hydraulic elevating Maxcab D270

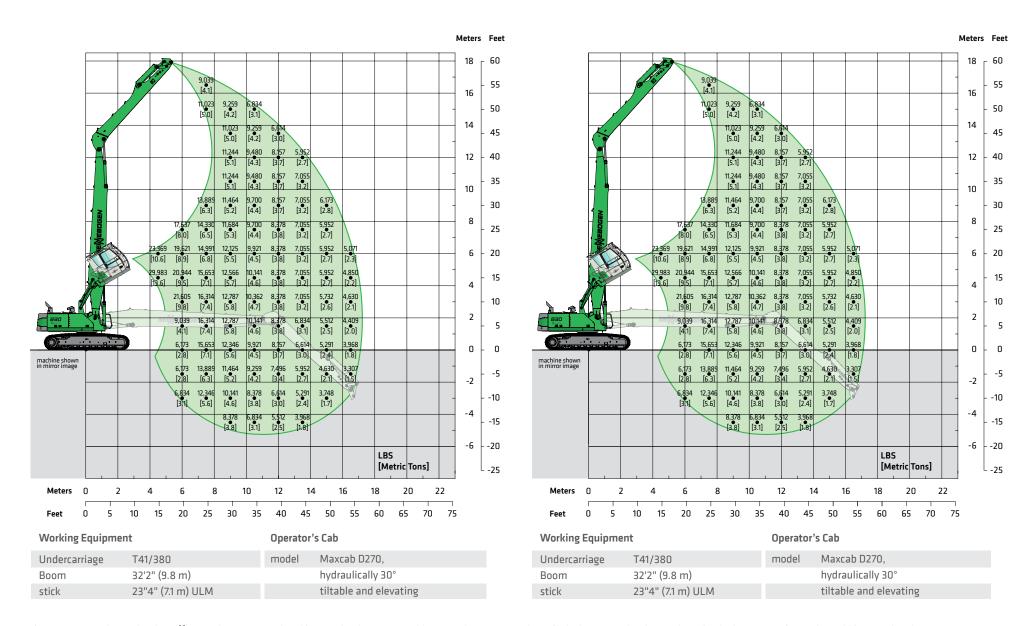

Lift Capacities - 830 R-HDD "E"

Lift capacities are stated in pounds. Values in [] are stated in metric tons. Indicated figures are based on ISO 10567 and do not exceed 75% or tipping and 87% of hydraulic capacity and machine standing on firm, level supporting surface. Loads are valid for 36° with machine support outgress. Lifting capacities do not include working equipment such as orange peel grapples, nagnets, clamshells, etc. The load point is the center line of the attachment pivot mounting pin on the stick. Their weights must be deducted from the numbers indicated with the loperator / user of the machine as orfer the attachment pivoted be SENVEBOGEN or your local dealer for optimum attachment selection. The operator / user of the machine as orfer the autiend equipped by SENVEBOGEN.

Lift Capacities - 830 R-HDD "E"

Lift capacities are stated in pounds. Values in [] are stated in metric tons. Indicated figures are based on ISO 10567 and do not exceed 75% or tipping and 87% of hydraulic capacity and machine standing on firm, level supporting surface. Loads are valid for 360^e with machine support outriggers. Lifting capacities do not include working equipment such as orange peel grapples, nagnets, clamshells, etc. The load point is the center line of the attachment pivot mounting pin on the stick. Their weights must be deducted from the operator / user of the machine as originally manufactured and equipped by SINNEBOGEN. Capacities apply only to the machine as originally manufactured and equipped SENNEBOGEN.
